Projects

Smart Water Quality Prediction Using ML And XAI

- Built a **Smart Water Quality Prediction System** using **machine learning** to classify water as **safe or unsafe**.
- Implemented **Explainable AI (XAI)** to interpret model decisions and show feature influence.
- Developed a **web-based application** using **Python, Streamlit, and scikit-learn**.
- Performed **data preprocessing, model training, and evaluation** for accurate predictions.
- Addressed a **real-world problem** by supporting access to **safe and potable water**.
- **Tech Stack:** Python | scikit-learn | Streamlit | Data Analysis | Explainable AI

Travel India Website

- Designed and developed a responsive travel website showcasing popular tourist destinations across India.
 - Implemented dynamic navigation, image galleries, and interactive UI components to enhance user experience.
 - Optimized layout and responsiveness across devices, resulting in increased user engagement and usability.
 - **Tech Stack:** HTML | CSS | JavaScript
-
